-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4-9, 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith (4497424).

In the embodiment of figure 12, Smith (4497424) teaches the device as claimed including a continuous band of rigid material (F) adapted to receive a user's foot there through; first and second loops (H) of said rigid material coupled to said continuous band in a substantially mirror image fashion, said first and second loops extending away from said continuous band in substantially perpendicular direction thereto; and a plurality of hooks (T) coupled to said continuous band and spaced apart there around, said plurality of hooks adapted to engage the opening of a foot covering while holding the opening of the foot covering in an expanded position aligned within areal confines defined by said continuous band. Note that the band is substantially circular. Also note that the hooks terminate in a rounded tip.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3765

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 3, 10, 11 and 15-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (4497424) in view of Livornese (6763982)

Smith teaches the invention as claimed as indicated above in the rejection to claim 1.

Smith does not teach a blunt end and hook portion attached to the device. Livornese teaches a sock donning aid device with a blunt portion (14) and a hook means (16). It would have been obvious at the time the invention was made to provide a blunt portion and hook means as shown by Livornese on the device of Smith in order to have additional abilities such as removing shoes and picking up stockings as indicated by Livornese.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
